

Current Asian Population and Asian Hate Crime Incidents in the New York City Metro

As of May 6th, 2021

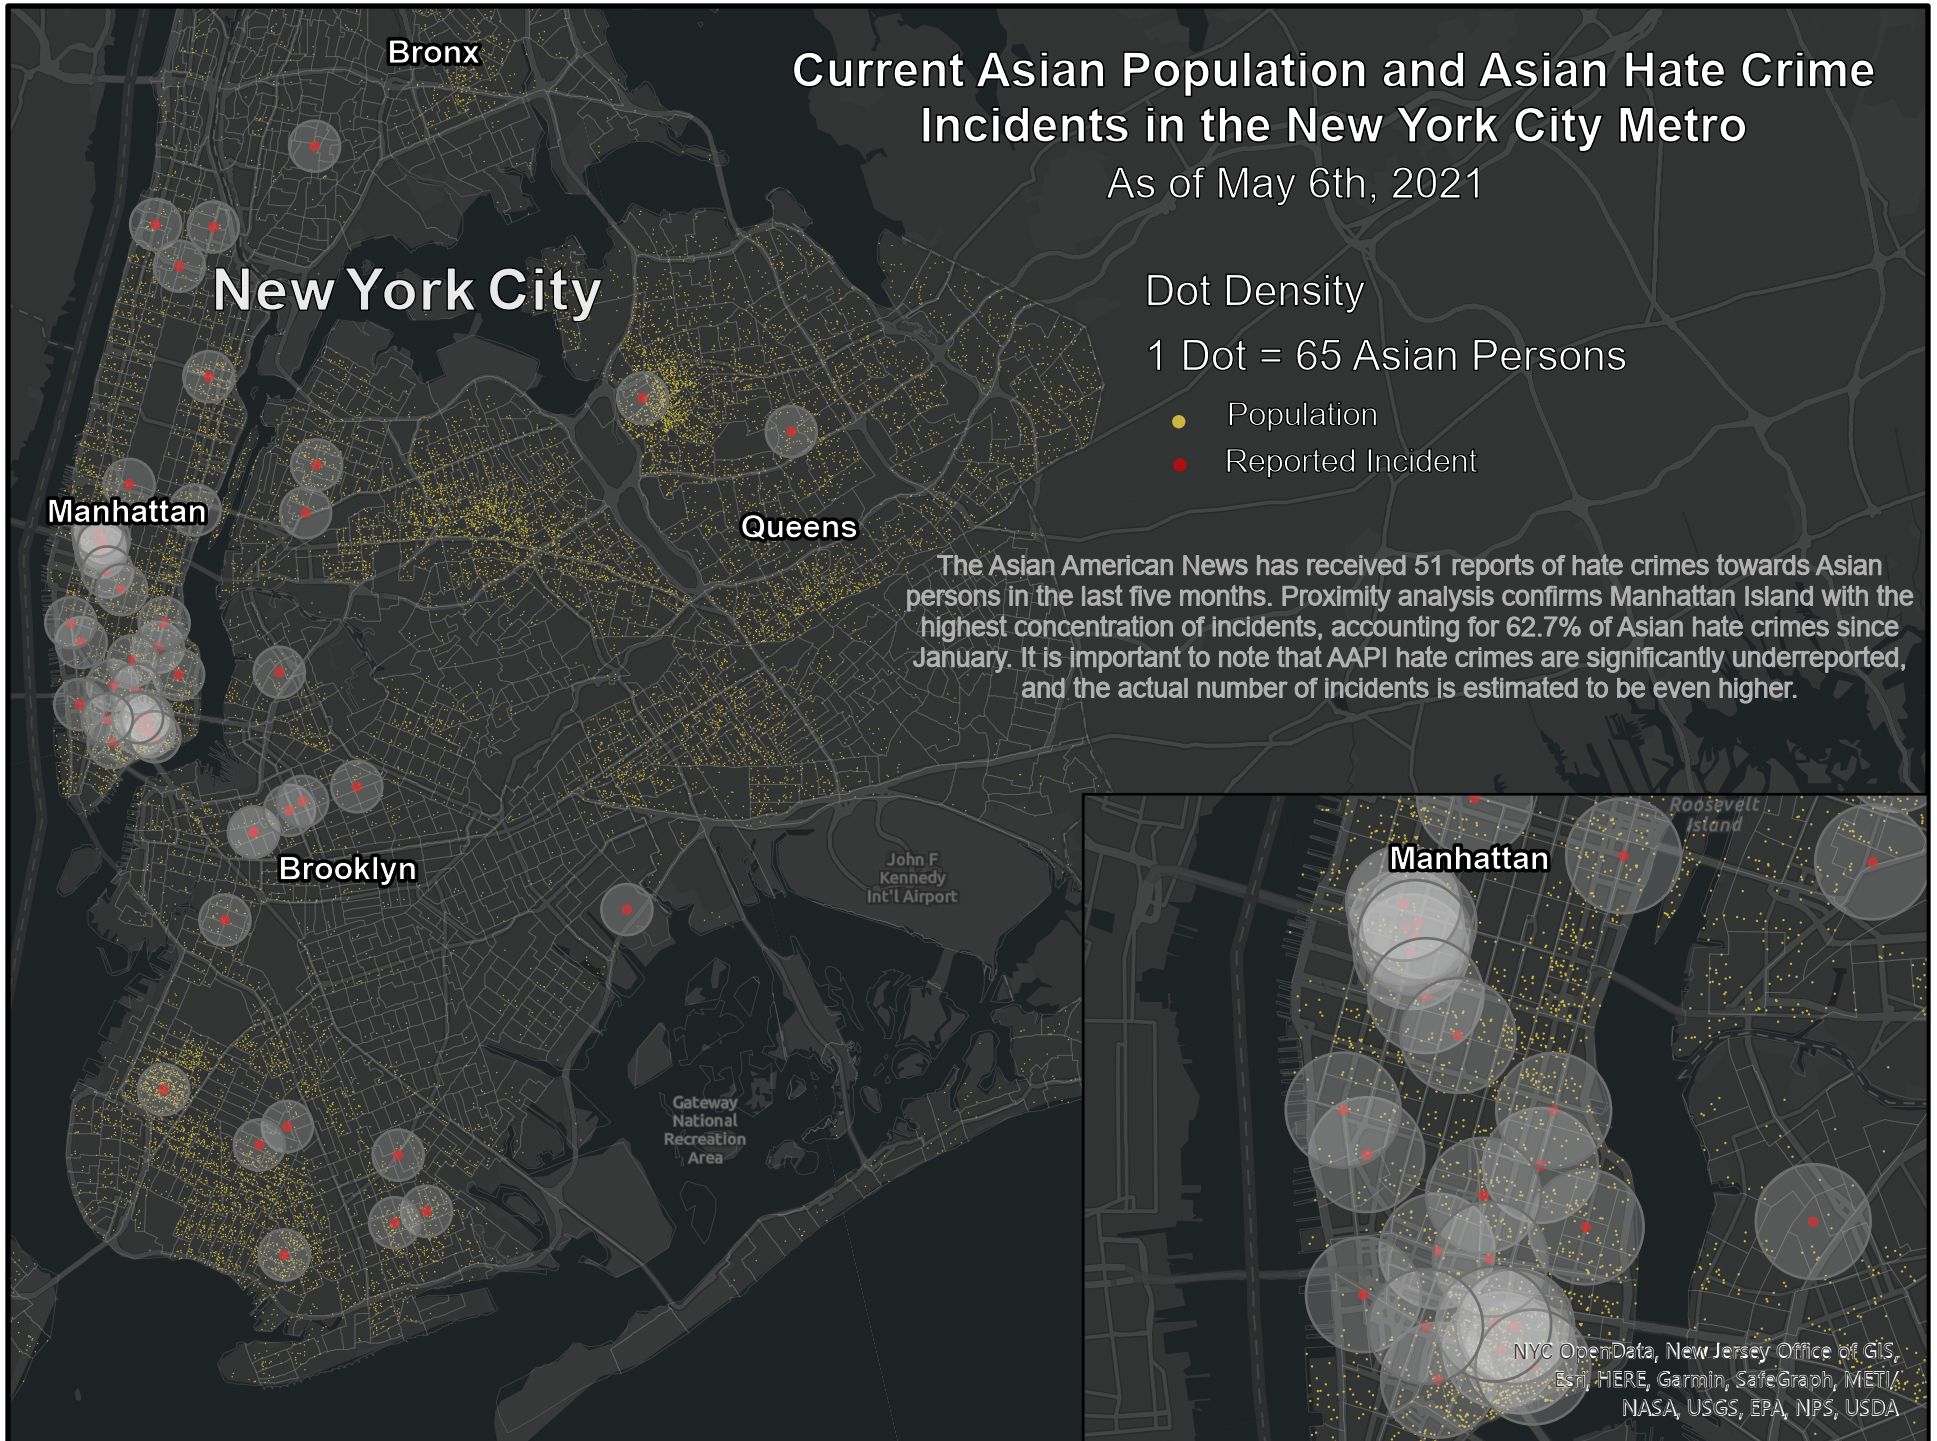

Dot Density

1 Dot = 65 Asian Persons

● Population

● Reported Incident

The Asian American News has received 51 reports of hate crimes towards Asian persons in the last five months. Proximity analysis confirms Manhattan Island with the highest concentration of incidents, accounting for 62.7% of Asian hate crimes since January. It is important to note that AAPI hate crimes are significantly underreported, and the actual number of incidents is estimated to be even higher.
